

Vaibhav Nawale

Full Stack .Net Developer

+91-9405672482 | vaibhavnawale2482@gmail.com | [GitHub](#) | [LinkedIn](#) | Chhatrapati Sambhajinagar, Maharashtra

Summary

Full Stack .NET Developer with hands-on experience building enterprise web applications using ASP.NET Core, C#, React.js, SQL Server, Entity Framework Core, and REST APIs. Experienced in developing secure backend services, designing relational databases, optimizing SQL queries and stored procedures, integrating responsive React applications, and debugging production issues. Built a production-ready Restaurant Ordering System using React, Node.js, Express.js, and PostgreSQL while following clean architecture and scalable software design principles.

Skills

- **Programming Languages:** C#, JavaScript, SQL, HTML, CSS
- **Frameworks & Tools:** ASP.NET Core, Node.js, Express.js, ASP.NET MVC, Web API, Entity Framework Core, LINQ, REST API, Microservices, JWT Authentication, Dependency Injection
- **Tools & Libraries:** React.js, Axios, IIS, Postman, Swagger UI, Git, GitHub.
- **Databases:** SQL Server, PostgreSQL, MySQL Database Design, Stored Procedures, Query Optimization, Indexes.
- **Core Competencies:** Object-Oriented Programming, Data Structures & Algorithms, Exception Handling, API Integration, Clean Architecture, Debugging & Problem Solving.

Experience

.NET Full Stack Developer | Sanyu Infotech Pvt. Ltd. Pune.
Present

December 2025–

- Developed enterprise-grade web applications using **ASP.NET Core, C#, Entity Framework Core, SQL Server, and React.js** following clean architecture and Repository Pattern.
- Build and implemented secure, scalable REST APIs using ASP.NET Core, incorporating JWT authentication, DTOs, dependency injection, validation, exception handling, and role-based access control to ensure maintainable and reliable backend services.
- Designed, developed, and maintained relational database objects including tables, stored procedures, views, and constraints while ensuring data integrity, normalization, and efficient data retrieval for enterprise applications.
- Implemented business logic by integrating ASP.NET Core Web APIs with SQL Server, performed data validation, managed DTO mappings, and ensured seamless communication between frontend and backend systems.
- Collaborated with cross-functional teams to analyze business requirements, troubleshoot production issues, implement feature enhancements, and deliver reliable software solutions through continuous testing and code improvements.
- Used Postman and Swagger for API testing, documentation, and validation.
- Worked with Git and GitHub for version control, feature development, code reviews, and collaborative development.
- Participated in requirement analysis, module enhancement, bug fixing, and production deployment activities.

Restaurant Ordering System

- Developed a full-stack **Restaurant Ordering System** using **React.js, Node.js, Express.js, and PostgreSQL**, enabling customers to browse menus, place orders, and manage their profiles.
- Designed and implemented secure **RESTful APIs** with **JWT authentication**, role-based authorization, and CRUD operations for customers, categories, menu items, addresses, and orders.
- Built a **normalized PostgreSQL database** with optimized schema design, table relationships, constraints, and efficient queries following the **Repository Pattern** for a scalable backend architecture.
- Integrated React frontend with backend REST APIs, implemented centralized error handling, request validation, and API documentation using Postman and Swagger while managing source code with Git and GitHub.

Education and Certifications

- **Bachelor of Technology (B. Tech) in Computer Science & Engineering (Data Science) (2022-2026):** P.E.S. College of Engineering, Chhatrapati Sambhajinagar Dr. Babasaheb Ambedkar Technological University (DBATU), Lonere.
- **Infosys Springboard 6.0 – Full Stack Development | 2025:** Completed hands-on training in full-stack web development covering front-end, back-end, databases, and application deployment.
- **Full-Stack web developer and back-end developer – Coursera (2025)**
