

Vaibhav Nawale

Full Stack .Net Developer

+91-9405672482 | vaibhavnawale2482gmail.com | [GitHub](#) | [LinkedIn](#) | Chhatrapati Sambhajinagar, Maharashtra

Summary

Dedicated .NET Full Stack Developer with hands-on experience in developing scalable web applications using ASP.NET Core, C#, Web API, SQL Server, JavaScript, and React.js. Skilled in backend development, REST API integration, database management, authentication, debugging, and frontend development. Experienced in working with real-time enterprise applications, bug fixing, clean architecture, and responsive UI development. Strong problem-solving abilities with a passion for writing clean and maintainable code.

Skills

- **Programming Languages :** C# , JavaScript, SQL, HTML, CSS
- **Frameworks & Tools:** ASP.NET Core, ASP.NET MVC, Web API, Entity Framework Core, LINQ, REST API, Microservices, JWT Authentication, Dependency Injection
- **Tools & Libraries:** React.js, Lombok, Postman, Swagger UI, Git, GitHub.
- **Databases:** SQL Server Management Studio, MySQL .
- **Core Competencies:** Object-Oriented Programming, Data Structures & Algorithms, Exception Handling, API Integration, Clean Architecture, Debugging & Problem Solving.

Experience

.NET Full Stack Developer | Abira Technologies Pvt. Ltd.

December 2025 – Present

- Developed and maintained scalable web applications using ASP.NET Core, C#, and SQL Server following a 3-tier architecture with Controller, Service, and Repository layers for clean and maintainable code structure.
- Built and consumed RESTful APIs using ASP.NET Core Web API to enable seamless frontend-backend integration and efficient data communication across modules.
- Implemented CRUD operations using Entity Framework Core, LINQ, SQL Server, and DTO-based data handling to manage application data efficiently and securely.
- Applied validations, exception handling, logging, and proper HTTP status codes to improve application reliability, maintainability, and overall system performance.
- Implemented JWT-based authentication and authorization mechanisms to provide secure API access, role-based access control, and protected user management features.
- Tested, debugged, and documented APIs using Postman and Swagger UI while collaborating on bug fixing and performance optimization for enterprise-level applications.
- Worked with frontend technologies including HTML, CSS, JavaScript, Bootstrap, and React.js to build responsive and user-friendly interfaces for web applications.
- Used Git and GitHub for version control, code management, and team collaboration while gaining exposure to microservices architecture, IIS hosting, and deployment concepts.

Full Stack Developer | Sanyu Infotech Pvt. Ltd.

December 2025 – May 2026

- Developed and maintained scalable web applications using ASP.NET Core, C#, and SQL Server following a 3-tier architecture with Controller, Service, and Repository layers for clean and maintainable code structure.
- Developed responsive and interactive user interfaces using HTML, CSS, JavaScript, Bootstrap, and React.js for web-based applications. Collaborated on frontend bug fixing, UI enhancements, and performance improvements to deliver clean and user-friendly interfaces.
- Built reusable UI components and integrated frontend modules with REST APIs for dynamic data handling and seamless user experience.
- Followed modern frontend development practices, clean UI design principles, and component-based architecture during application development.

Certifications

- **Infosys Springboard 6.0 – Full Stack Development | 2025 :** Completed hands-on training in full-stack web development covering front-end, back-end, databases, and application deployment.
- **Full-Stack web developer and back-end developer – Coursera (2025)**

Education

- **Bachelor of Technology (B.Tech) in Computer Science and Engineering** P.E.S. College of Engineering, Chhatrapati Sambhajinagar Dr. Babasaheb Ambedkar Technological University (DBATU), Lonere.
