

Vaibhav Nawale

Full Stack .Net Developer

+91-9405672482 | vaibhavnawale2482@gmail.com | [GitHub](#) | [LinkedIn](#) | Chhatrapati Sambhajnagar, Maharashtra

Summary

Full Stack .NET Developer with hands-on experience building enterprise web applications using ASP.NET Core, C#, React.js, SQL Server, Entity Framework Core, and REST APIs. Experienced in developing secure backend services, designing relational databases, optimizing SQL queries and stored procedures, integrating responsive React applications, and debugging production issues. Built a production-ready Restaurant Ordering System using React, Node.js, Express.js, and PostgreSQL while following clean architecture and scalable software design principles.

Skills

- **Programming Languages:** C#, JavaScript, SQL, HTML, CSS
- **Frameworks & Tools:** ASP.NET Core, Node.js, Express.js, ASP.NET MVC, Web API, Entity Framework Core, LINQ, REST API, Microservices, JWT Authentication, Dependency Injection
- **Tools & Libraries:** React.js, Axios, IIS, Postman, Swagger UI, Git, GitHub.
- **Databases:** SQL Server, PostgreSQL, MySQL Database Design, Stored Procedures, Query Optimization, Indexes.
- **Core Competencies:** Object-Oriented Programming, Data Structures & Algorithms, Exception Handling, API Integration, Clean Architecture, Debugging & Problem Solving.

Experience

.NET Full Stack Developer | Abira Technologies Pvt. Ltd.

December 2025 – Present

- Developed enterprise-grade web applications using **ASP.NET Core, C#, Entity Framework Core, SQL Server, and React.js** following clean architecture and Repository Pattern.
- Designed and implemented secure, scalable REST APIs using ASP.NET Core, incorporating JWT authentication, DTOs, dependency injection, validation, exception handling, and role-based access control to ensure maintainable and reliable backend services.
- Worked extensively on **database design**, SQL Server schema creation, table relationships, foreign keys, stored procedures, joins, indexes, and query enhance.
- Optimized SQL queries and backend APIs to improve application performance, maintainability, and overall system reliability.
- Developed complex SQL queries, optimized existing queries, resolved database performance bottlenecks, and handled production data issues.
- Debugged backend APIs, fixed production bugs, analyzed logs, and resolved database-related issues to improve application stability.
- Used Postman and Swagger for API testing, documentation, and validation.
- Worked with Git and GitHub for version control, feature development, code reviews, and collaborative development.
- Participated in requirement analysis, module enhancement, bug fixing, and production deployment activities.

Restaurant Ordering System

- Developed a full-stack **Restaurant Ordering System** using **React.js, Node.js, Express.js, and PostgreSQL**, enabling customers to browse menus, place orders, and manage their profiles.
- Designed and implemented secure **RESTful APIs** with **JWT authentication**, role-based authorization, and CRUD operations for customers, categories, menu items, addresses, and orders.
- Built a **normalized PostgreSQL database** with optimized schema design, table relationships, constraints, and efficient queries following the **Repository Pattern** for a scalable backend architecture.
- Integrated React frontend with backend REST APIs, implemented centralized error handling, request validation, and API documentation using Postman and Swagger while managing source code with Git and GitHub.

Education and Certifications

- **Bachelor of Technology (B. Tech) in Computer Science & Engineering (Data Science) (2022-2026):** P.E.S. College of Engineering, Chhatrapati Sambhajnagar Dr. Babasaheb Ambedkar Technological University (DBATU), Lonere.
- **Infosys Springboard 6.0 – Full Stack Development | 2025:** Completed hands-on training in full-stack web development covering front-end, back-end, databases, and application deployment.
- **Full-Stack web developer and back-end developer – Coursera (2025)**
